Segment-4:

1) Scenario based ques on DFD, rules of Dfd, diff bet. logical and physical DFD.
2) Decision table and decision tree theory or scenario.

Segment-5:

1) Top down and bottom up
2) Objectives of input design. Good and bad form design with example
3) Steps of system design
4) **Draw ER diagram

Segment-6:

1) **Cyclomatic complexity from flow graph
2) What is system testing and why imp
3) White box and black box with example or scenario based
4) Alpha, beta, stress, recovery, equivalent partitioning

Segment-7:

1) What is system implementation, its type, success factors
2) What is system maintenance, its type, corrective, adaptive…..
3) **Scenario based from maintenance
4) 7 training method, EPSS, Documentation
5) Maintenance req figure

Segment-8:

1) Hardware software selection criteria
2) Threat and types of threats, Diff bet vulnerability and threat
3) Security issue and its types, security goals
4) Access control matrix
5) Defense methods theory or scenario based
6) Short note: all prvs ques short note

****Keep in mind that ques will moderate.**
